

SageIT_Folder Synchronization

Bot Overview

This Bot will Synchronize the files in the Source Folder to the Destination Folder.

Pre-Requisites

- Automation Anywhere Enterprise v11 or higher.

Installation:

- Download the bot from Bot Store.
- You will receive a Windows MSI package to deploy the bot.
- Complete the Bot installation with license key, now the bot will be available to run from AA client.

Create the following folder structure of the content in the AA Dir:

- <AA Directory>
 - o My Tasks
 - Bot Store
 - SageIT_Folder Synchronization
 - o My Tasks
 - **SageIT_Folder Synchronization.atmx**
 - o Input File
 - **Source Folder with files**
 - o Output File
 - **Destination Folder with Synchronized files**
 - o Error Folder
 - Logs
 - Snapshots

How to Use the Bot:

Please Validate the following Parameters with respect to your Environment

Parameter Name	Type	Direction	Additional Info
vMyTaskPath	String	Input	Please validate the Path where you installed this BOT
vErrorFolder	String	Input	Error Folder inside bot folder contains Logs & Snapshot folder.
vLogFolder	String	Input	Log folder contains Log file in the event of error.
vSnapshotFolder	String	Input	Snapshot folder contains screenshots in the event of error.

Steps

- Select the Source Folder to Synchronize.
- Run the Bot

Output

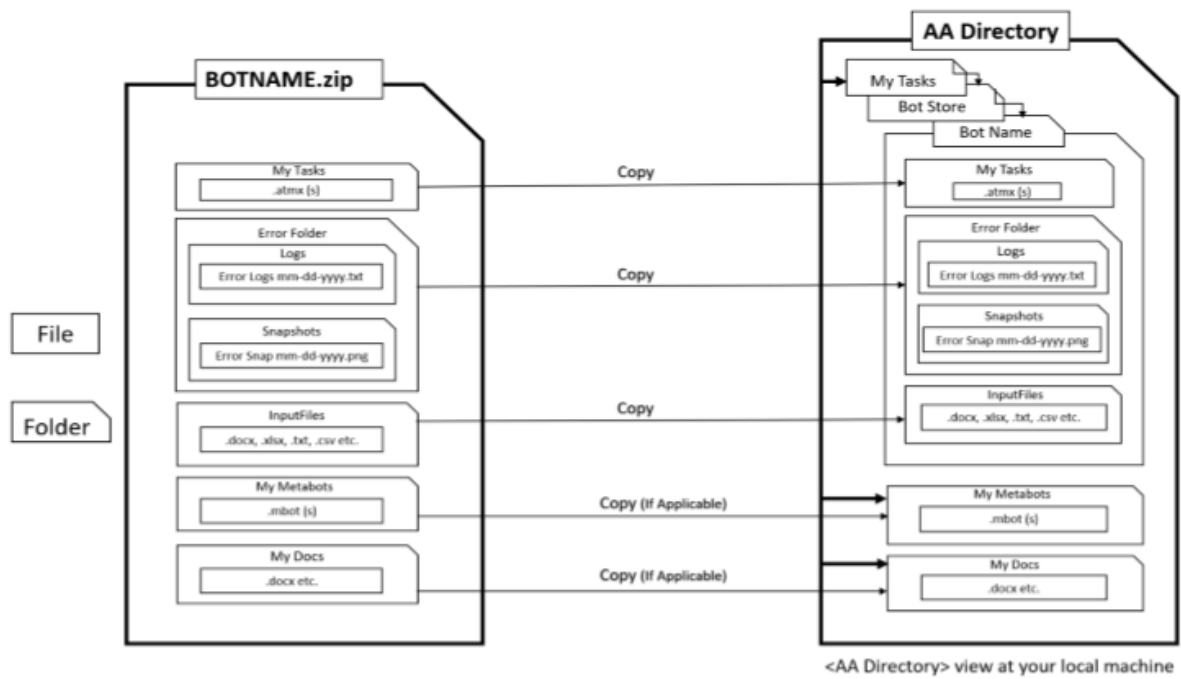

- Select the Destination Folder to which the Files have to be synchronized.

Error Handling

Each Bot folder contains the below hierarchy.

- Error Folder
 - o Logs
 - Following File is created if any Error occurs
 - SageIT_Folder Synchronization_Logs_<MM-DD-YYYY-hh-mm-sec-milli>.txt
 - o Snapshots
 - Following snapshot file is created if any Error occurs
 - SageIT_Folder Synchronization _Snap_<MM-DD-YYYY-hh-mm-sec-milli>.png
