ReadMe – Folder Archival – Thirdware Solutions

Bot Overview

This bot performs the following:

- This bot is used to archive the folder to another folder
- This folder movement is different from Copy Folder Command. It will move the file and folders available in the source folder rather than moving entire source folder (along with the same source folder name).

Prerequisites

- Automation Anywhere Enterprise v11.1.2.0

Installation

- Download the bot from Bot Store.
- Double click on <Bot Name>.msi and follow the installation instructions.

For first time users, the "Bot Store" folder is created under <AA Directory>/My Tasks (on your local disk).

Create the following folder structure of the content in the AA Dir:

- <AA Directory>
  - My Tasks
    - BotStore
      - Folder_Archival (Folder)
        - My Tasks
          - Folder_Archival.atmx
        - Error
          - Log (Folder)
            - Error Logs Month-Day-Year.txt
          - Snapshot (Folder)
            - Error Snap Month-Day-Year.png
  - My MetaBots
    - Mbot_Utility_Folder_Archival.mbot

How to Use the Bot:

Use the following information to configure your bot:

Parameter Name	Type	Direction	Additional Info
vSourceFolder	String	Input	Source Folder Path
vDestinationFolder	String	Input	Destination Folder Path
vError	String	Output	Error text returned in case of any exception for logging

Error Handling

- Each Bot folder contains the below hierarchy.
  - Error Folder
    - Logs

- Error Logs Month-Day-Year.txt: In case of any error, this file logs error message along with time stamp
  - Snapshots
    - Error Snap Month-Day-Year.png: In case of any error, this file captures screenshot of error.
- Task Status of bot is set to failed in case of error.

Note: Source Folder will be wiped out and all files are transferred to Destination
